- Due to the indication by one of the tenderers that the technical specification of the Inquiry should not indicate specific technical solutions, the Ordering Party decides to amend the provisions of the Technical Specification of the Inquiry (Annex SIWZ_AMDS_03_2022_0786_PL_ geometry measurement) regarding the point "Requirements for the number of measurements on a single sheet" in following way:

CURRENT VERSION:

Flatness - measurement performed with the use of laser line technology or another technology that allows for measurements covering the entire width of the tested material. The use of laser point technology is not allowed. The frequency of measurements along the length of the material not less than every 50mm.

VERSION AFTER CHANGES:

Flatness - measurement performed with the use of laser line technology or another technology that allows for measurements covering the entire width of the tested material. The frequency of measurements along the length of the material not less than every 50mm.

Announcement No. 3 is only a detailed specification of the existing provisions of the inquiry. The remaining content of the inquiry remains unchanged.
